KEY ELEMENTS

- Site inspection
- Photographic recording
- Topographic surveying

SUMMARY DETAIL:

Prime contractor for the NYS OGS contract for surveying and inspection of the residence structures at NYS fish hatchery facilities (16 locations across New York State).

Topographic surveys of property boundaries and details of structures on property, as well as photographic records of the condition of each structure. Survey observations and assessments of property details include site, exterior, roof systems, structural, plumbing systems, electrical systems, heating systems, air condition system, as well as the interior of the structure to provide rating and recommendations for repair and/or replacement.

*Mr. MacDonald completed this project as principle of MacDonald Land Surveying & Engineering with subcontracting support from Tolman Engineering, Architecture & Surveying PLLC
